

REHAB POTENTIAL

Relative gains similar between those with mild-moderate dementia and those without

Nursing home residents with dementia **CAN** benefit
studies show reduced functional decline

Dementia can affect mobility through

Higher cognitive disorder

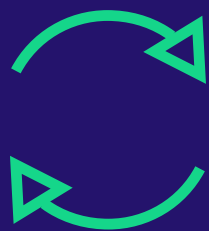

Higher gait disorder

Direct impact on balance

Risk perception

Assume everyone has rehab potential as a starting point, until you **KNOW** otherwise.

I want to go home

Teams tend to judge rehab potential based on

- Carry over
- Functional Gain
- Recovery Trajectory
