

Community Frailty services

1) Anticipatory care teams work to proactively assess and support older adults to maintain quality of life and independence using a person centred approach.

2) Teams might include Community Matrons, Care coordinators, GP's and more, as well as working closely with other community teams such as district nursing, OT pharmacists, physiotherapy and more.

3) Frailty services can work with older adults across the spectrum of frailty from those identified and mildly frail to those who are more severely frail

4) Teams work with patients to design care that supports their own wishes and priorities, which sometimes may be different to ours as professionals.

5) There are a variety of names for teams that proactively support older adults.

What are they called in your area? Let us know
